

Internal Support Handbook

IT Network Issues

For WiFi and laptop connectivity problems, verify the corporate SSID, forget/re-add the network, restart the wireless router, and restart the laptop.

VPN Access

New contractors need VPN credentials and shared drive access. Confirm manager approval, create the account, and provide the credentials.

Printers

Clear paper trays, check jam sensors, and reboot the printer. If the jam error persists with an empty tray, create a ticket for the printer.

HR Payslips and Leave

Missing payslips or incorrect leave balances should be routed to HR. Ask for the pay period and employee ID. Do not provide payslips to contractors.

Facilities Requests

Standing desks, broken chairs, parking passes, and HVAC issues belong to Facilities. Water leaks are URGENT and should be reported immediately.

Onboarding

Coordinate laptop, badge, and account setup for new hires at least five business days before start date.
